## ABOUT ME

I am an undergraduate Software Engineering student with a passion for technology and problem-solving. I enjoy building responsive web applications and exploring areas like data handling, APIs, and modern frameworks. Always curious and eager to learn, I continuously work on improving my skills across both frontend and backend development.

## EDUCATION

### 2023-present

Government College  
University, fsd

### BS Software Engineering

As a Computer Science student, I have worked on various university projects to strengthen my understanding and have developed skills in areas like web development to advance in this field.

### 2021-2023

Superior College  
faisalabad

### FSC-pre medical

As a passionate medical student, I scored 93% in FSC, topped my college, and actively participated in various extracurricular activities.

## EXPERIENCE

### 2023

IT Hub

### Content Writer

As a Creative Content Writer at IT Hub, I have applied my writing skills to craft engaging content for various websites across different domains.

### 2024-present

Upwork and linked inn

### Frontend Web developer

I have developed several website frontends, including a responsive weather web app for real-time weather detection. I am currently active on Upwork and LinkedIn, offering my services as a web developer.
